Theme of Session:

The focal objective of the special session on “Emerging Technologies & Upcoming Trends in IT for Engineering, Science & Human Resource Management (ETEHRM)” is to discuss about the technological and scientific development through the ages. The main aim of this special session (such a vast area) is to involve all the Engineering Candidates and Management researchers and academicians to get involved in the conference and their contribution of research papers to exchange and share their experiences and research results about all aspects of Engineering and Management. It also provides a forum for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of Engineering, Science and Management. This will provide a forum for the interaction and integration in these related disciplines.

Topics of Interest:

Full length original and unpublished research papers based on theoretical or experimental contributions related to the below mentioned tracks are invited for submission in this special session:

Tracks: (Sub-Themes)

- **Business Intelligence & IT Security, Ethical Hacking, Alignment of Business and IT Security Efforts,**
